Hanuman Gym — Enterprise Athletic Ecosystem

15-Minute 6-Member Master Presentation & Evaluation Defense Guide

Part 1: The Problem & Our Solution (Executive Summary)

The Problem in the Fitness Industry	The Hanuman Gym Enterprise Solution
• **Fragmented Tools:** Users juggle 4-5 apps (YouTube, MyFitnessPal, Excel, WhatsApp). • **Generic PDF Plans:** Non-scientific workouts with zero personalized 1RM progression. • **Zero Gym Transparency:** No live gym crowd meters or verified equipment status. • **Manual Gym Management:** Gym owners struggle with manual member tracking.	• **All-in-One Full-Stack Ecosystem:** Unifies workout, nutrition, form, and admin. • **AI Workout Plan Generator:** 2,000 scientific plans + Epley 1RM + EMG substitutions. • **Interactive Form & Nutrition:** 24 video tutorials & real-time macro portion scaler. • **10 Maharashtra Branches & 5k Telemetry:** GPS distance + pre-seeded enterprise admin.

Part 2: 15-Minute Presentation Schedule (6 Members)

Member	Assigned Focus & Modules	What to Screen Share	Time Slot
Member 1	Problem Statement, Vision, Brand UX & Memberships	P Home/index.html Memberships/index.html	**0:00 – 2:30 (2.5 min)**
Member 2	AI Workout Engine, 2,000 Plans, 1RM & Sports Science	custom workout plan/workout-plan.html	**2:30 – 5:00 (2.5 min)**
Member 3	24-Movement Form Video Academy & 12 Master Trainers	Form module/index.html Training_Section/index.html	**5:00 – 7:15 (2.25 min)**
Member 4	Dynamic Macro Scaler & 10 Branch Geolocation Hub	P Recipe/recipes.html Locations/location.html	**7:15 – 9:30 (2.25 min)**
Member 5	Pro E-Commerce Store & Athlete Command Center	store/index.html login_register/dashboard.html	**9:30 – 11:45 (2.25 min)**
Member 6	FastAPI, 5k Telemetry, Docker & 187 QA Tests	admin/index.html FastAPI Docs /docs	**11:45 – 14:30 (2.75 min)**
All Team	Conclusion, Closing Remarks & Evaluator Q&A;	Ready for Questions	**14:30 – 15:00 (0.5 min)**

Part 3: Member-by-Member Spoken Scripts

Read these exact, simple scripts during your presentation turn. Every script includes what to say and the clean handoff to the next teammate.

Member 1 (0:00 – 2:30) — Problem Statement & Brand UX | *Screen: P Home/index.html & Memberships/index.html*

What to Say:

*"Good morning respected evaluators. Today, millions join gyms, but over 70% quit within months because the fitness experience is fragmented across disconnected apps, YouTube videos, and manual spreadsheets. We built **Hanuman Gym Enterprise** — a single, unified athletic performance management ecosystem.*
*On our Home Page, users experience a modern, responsive design with clean typography hierarchy. On our **Memberships module**, users choose between Standard, Pro, Elite, and VIP tiers, calculate pass validity, and generate instant referral links and corporate wellness inquiries."*

Handoff to Next Member: *"Now, the heart of our platform is the AI workout generator. I hand over to [Member 2] to demonstrate how it solves generic planning."*

Member 2 (2:30 – 5:00) — AI Workout Engine & Sports Science | *Screen: custom workout plan/workout-plan.html*

What to Say:

*"Thank you, [Member 1]. Most fitness apps offer generic PDF plans. Our **Custom Workout Plan Engine** analyzes 10 key criteria: age, biological gender, body type, body fat tier, experience, and training frequency. It matches the user against our dataset of **2,000 professional 12-week workout plans** in under 3 seconds, providing an exact Match % and Confidence Score.*
*We integrated real sports science: the **Epley Formula for 1RM** auto-calculates max lifting strength safely, and **EMG Exercise Substitution** swaps movements when equipment is missing or an injury is flagged. We also provide 7 pre-built flagship splits like Push-Pull-Legs and Arnold Era splits."*

Handoff to Next Member: *"To ensure every movement is executed with 100% proper form, [Member 3] will explain our Form Academy and Coach Booking."*

Member 3 (5:00 – 7:15) — Video Form Academy & Trainer Booking | *Screen: Form module/index.html & Training_Section/index.html*

What to Say:

*"Thank you, [Member 2]. Bad form causes acute injuries and stops progress. Our **Form Module** is an interactive technique academy with **24 movement video tutorials** across all major muscle groups (chest, back, arms, legs, core). Athletes can filter by muscle group, inspect biomechanical cues, watch demonstrations, and bookmark exercises.*
*When personal coaching is desired, our **Training Section** connects members to **12 certified Master Coaches** with verified badges, experience ratings, and transparent tiered booking drawers (Basic, Standard, and Premium)."*

Handoff to Next Member: *"Nutrition and gym accessibility are essential to results. [Member 4] will now present our Recipe Engine and Geolocation Hub."*

Member 4 (7:15 – 9:30) — Dynamic Recipe Scaler & Geolocation | *Screen: P Recipe/recipes.html & Locations/location.html*

What to Say:

*"Thank you, [Member 3]. Nutrition accounts for 70% of results. In our **P Recipe** module, we built 12 athletic recipes with:*
*1) **Dynamic Macro Scaler:** Multiplier scaling (1x–4x servings) recalculates calories, protein, carbs, and fats in real time.*
*2) **Unit Converter & Timers:** Metric/Imperial toggles and in-kitchen step timers with sound alerts.*
*3) **Weekly Grocery Drawer:** Exportable ingredient checklists.*
*For physical facilities, our **Locations Module** networks **10 Maharashtra branches** (Pune, Mumbai, Nagpur, etc.) using the **Haversine Distance Formula** on device GPS to calculate exact distance, paired with **Live Crowd Meters** to check gym rush before visiting."*

Handoff to Next Member: *"Next, [Member 5] will showcase our Pro E-Commerce Store and Athlete Command Center."*

Member 5 (9:30 – 11:45) — Pro E-Commerce Store & Athlete Command Center | *Screen: store/index.html & login_register/dashboard.html*

What to Say:

*"Thank you, [Member 4]. Our **Pro Store** is an e-commerce hub for high-grade apparel, lifting belts, and supplements featuring a live cart, coupon validation (ELITE20, HANUMAN10), and UPI/Card checkout.*
*Security is handled via decoupled **FastAPI JWT Authentication** with Role-Based Access Control.*
*Inside **My Space (Athlete Command Center)**, athletes access:*
*• **5 Real-Time Chart.js Graphs:** Tracking bodyweight, hydration, calories, workout frequency, and volume.*
*• **Financial Ledger:** Purchase history across memberships, coaching, and store orders.*
*• **Iron Streak Tracker & PR Records:** Gamified streak counter, personal records, and PDF performance export."*

Handoff to Next Member: *"To explain our enterprise backend, 5,000-user database, Docker setup, and testing, here is [Member 6]."*

Member 6 (11:45 – 14:30) — Backend, 5,000 Data Seeder & QA Testing | *Screen: admin/index.html & FastAPI Swagger Docs /docs*

What to Say:

*"Thank you, [Member 5]. Hanuman Gym is built on an enterprise **Multi-Tier Hybrid Architecture**: a high-speed **FastAPI (Python 3.11)** REST API, **PostgreSQL 16 Alpine** database, and a **Dual-Engine Cloud Fallback** (syncs with Supabase Cloud, falls back to LocalStorage if offline).*
*In our **Admin Command Center**, we generated and pre-seeded a telemetry dataset of **5,000 verified athletes** with nearly 7,000 transactions, 2,400+ logged workouts, equipment maintenance, and CRM leads, with a 1-click seeder button.*
*The system is containerized via **Docker Compose** and maintained with **10 automated test suites and 187 passing assertions (100% Pass Rate)**."*

Handoff to Next Member: *"Hanuman Gym is a production-ready, mathematically verified athletic enterprise. We welcome your questions!"*

Part 4: 5 Technical & Sports Science Standouts

These 5 features prove your project has genuine algorithmic depth rather than just static web pages:

Innovation / Formula	Plain English Explanation	Why Evaluators Are Impressed
Epley 1RM Formula	1RM = Weight × (1 + Reps / 30) Calculates maximum single-rep lifting capacity from submaximal training sets.	Applies proven exercise biomechanics rather than guesswork or hardcoded numbers.
2,000-Plan Dataset Matching	Matches 10 user criteria against 2,000 JSON workout blueprints in under 3 seconds with confidence metrics.	Demonstrates real algorithmic data modeling and high-speed multi-attribute query matching.
Dual-Engine Cloud Fallback	Tries Supabase Cloud REST first; if network is down, writes to LocalStorage and re-syncs when online.	Ensures high availability and zero application freezing during network drops.
Haversine Distance Formula	Calculates accurate spherical distance between user GPS coordinates and 10 gym locations.	Implements actual spherical trigonometry for branch locator accuracy.
187 Automated Tests (100% Pass)	10 automated unit test suites verifying BMR/TDEE, 1RM math, RP volume landmarks, and APIs.	Proves rigorous software engineering standards and production-readiness.

Part 5: Evaluator Q&A; Defense Cheat Sheet

Q1: What makes your project different from typical fitness websites?
Answer: Most gym sites are static brochures. Hanuman Gym is a full-stack operating system combining an AI workout generator with 2,000 blueprints, video form academy, dynamic nutrition scaler, 10 branch geolocation with crowd meters, athlete analytics, and an admin command center tested with 5,000 verified athletes.

Q2: How does the AI workout engine create personalized plans?
Answer: It collects 10 biometric attributes through an assessment wizard, matches them against a 2,000-plan dataset using weighted scoring, calculates 1RM with the Epley formula, and applies EMG muscle substitution for injury management.

Q3: What backend and database technologies are used?
Answer: We utilize a Python 3.11 FastAPI microservice with PostgreSQL 16 Alpine, Alembic migrations, Supabase Cloud synchronization, and Docker Compose multi-container orchestration.

Q4: How did you test and verify system accuracy?
Answer: We maintain 10 automated test suites with 187 passing assertions (100% Pass Rate) validating 1RM math, BMR/TDEE calculations, Haversine geolocation, and cloud synchronization adapters.

Presentation Golden Rule: Have your 6 browser tabs pre-opened in exact order, keep transitions under 5 seconds, and speak with confidence!
